

What would you do if the government system failed? What would you do if you could no longer afford to stay in your home? What would you do if the water and electric companies charged so much that you could not afford to pay the bills? What would you do if there were a global or nationwide electrical black out? What would you do, if you could no longer drive anywhere because gas prices were increased to a completely unaffordable rate? How would you survive in this world if we lost EVERYTHING we currently have to survive on?

No home.* *No water.* *No food.* *No electricity.* *No transportation.

This is a pretty scary thing to consider but these are questions we need to be thinking about. With the economy and government in such a mess, it is getting to a point that a lot of people are actually losing everything they have or had. The cost of living in and of itself is becoming nearly impossible. Utility companies are charging ridiculous prices. Oil companies are constantly raising gas prices. Even buying groceries is becoming a real challenge for many families. We may be going into another great depression... and this one looks very bad! This is quickly becoming a race for survival and the battle is just beginning! We are heading into the End Times! We need a solution! We need a plan for survival!

That is what the GREAT SHEPHERD RANCH ASSOCIATION is for. GSRA is a plan for survival inspired by God. It is a very large project that will benefit thousands and thousands of people by providing food and shelter to those in need. GSRA will become a nationwide (and possibly worldwide) project to provide safe havens for all True Christians during these End Times.

GSRA will use any and all possible natural resources to provide water, food, shelter, electricity, clothing, etc. to people in need. GSRA will be a dual-purpose project- A for-profit organic farm & A non-profit Christian cooperative community.

For more information about GSRA, please visit the official website: <http://www.whisperoflife.com/GSRA>
